

## Loparex Paper Sourcing Policy

It is Loparex's policy to maintain commitment to the responsible sourcing of paper and to work solely with suppliers who share these values.

Responsibly-sourced paper will:

- Contain fiber that is legally harvested, sourced, transported, and exported from its country of origin.
- Contain fiber that is traceable through the supply chain to the source of harvest.
- Comply with local regulations.
- Protect high conservation values including intact forest landscapes and protection of peatlands.
- Protect high carbon stock areas and avoid conversion.
- Respect indigenous people's rights with free prior and informed consent.
- Respect and comply with all worker safety standards and labor and human rights regulations, including no forced or child labor.

Loparex will achieve this by:

- Periodically communicating expectations to its paper suppliers and other stakeholders, including its employees.
- Soliciting reasonable evidence, including appropriate documentation and when requested, full traceability details that its paper suppliers comply with all facets of this policy.
- Routinely conducting audits as necessary to ensure compliance with all facets of this policy and updating relevant information on file as evidence of such compliance.
- Qualifying potential new vendors in a way that is fully consistent with all facets of this policy.
- Encouraging and supporting paper suppliers to continuously improve and strive to become fully compliant with all facets of this policy.

As a leading developer and producer of release liners, Loparex is committed to working with its paper suppliers to ensure this policy is fully implemented across its global network.

A handwritten signature in blue ink, appearing to read "S. Seeb".

Steven R. Seeb  
Chief Procurement Officer
